

12 watts /m LED Strip
LEDS-12W Single Row (IP20 non waterproof)

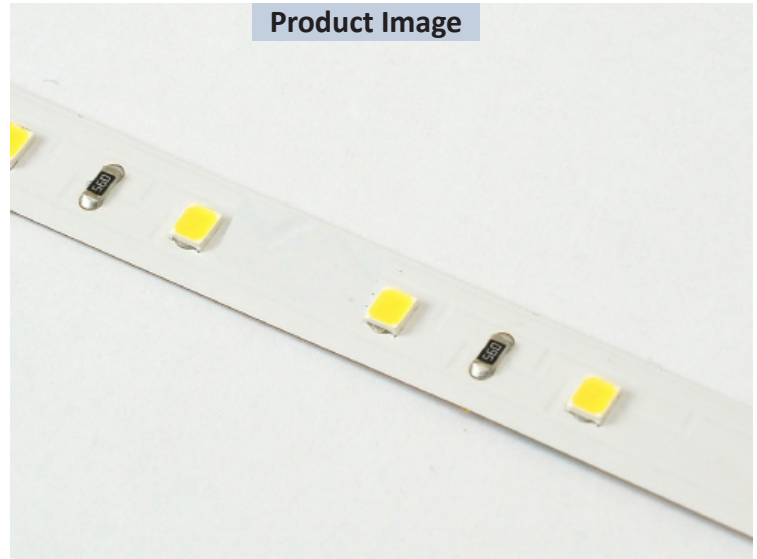

Product Description

Our LED Strip is manufactured employing some of the highest quality PCB board and LED components available. Adopting a rigorous LED chip binning process, we maintain a consistent CCT on every batch of LED strip produced.

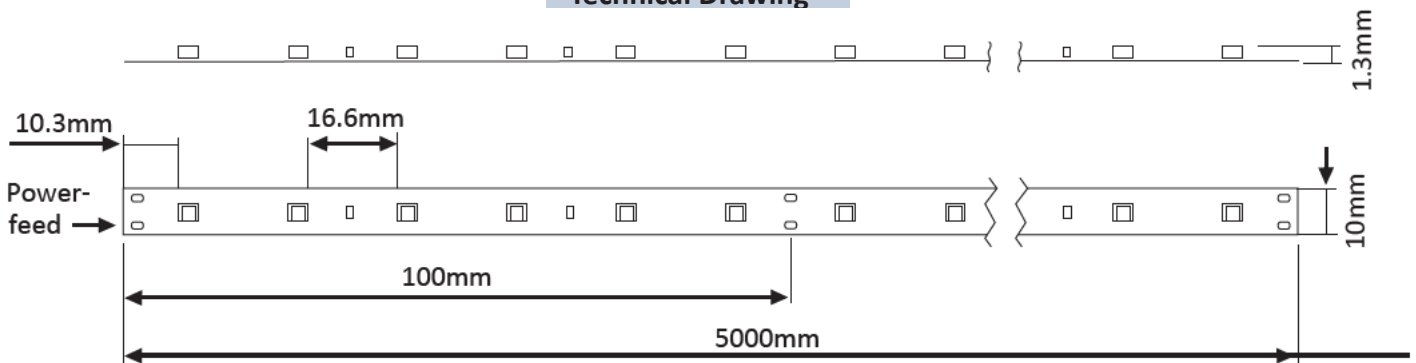

Our 12w/m LED strip is mounted on a double layer 2 oz. copper PCB to ensure a durable range; using a 2835 SMD chip set, this product provides a high efficiency output of 22-24 Lumens per LED.

All our strips come as standard with the highest grade self adhesive, 300MP. 12 watts LED strip **MUST** be mounted on an aluminium profile to guarantee product performance and warranty.

Technical Drawing

Technical Specification

Max Wattage	12 w/m	Dimension	5000mm x 10mm
LED Chip	SMD 2835	Cut	Every 100mm
LEDs per meter	60LEDs	Colour Rendering Index	Ra > 80
Construction	PCB	Beam Angle	120°
IP rating	IP20	Energy Efficiency Rating	A+
Fixture	Self Adhesive (300MP)	Estimated Life	35.000 Hours
Voltage	24V		

Product Code	IP Rating	Colour Temp	Lumens/m	Lumens/w
LEDS-12W-3K	IP20	3000K	1350 lm	112.5 lm/w
LEDS-12W-4K	IP20	4000K	1380 lm	115 lm/w
