

**19.2 watts /m LED Strip  
LEDS-19.2W Single Row (IP20 non waterproof)**

**Product Description**

Our LED Strip is manufactured employing some of the highest quality PCB board and LED components available. Adopting a rigorous LED chip binning process, we maintain a consistent CCT on every batch of LED strip produced.

Our 19.2 w/m LED strip is mounted on a double layer 2 oz. copper PCB to ensure a durable range; using a 3528 SMD chip set, this product provides a high efficiency output of 5-6 Lumens per LED.

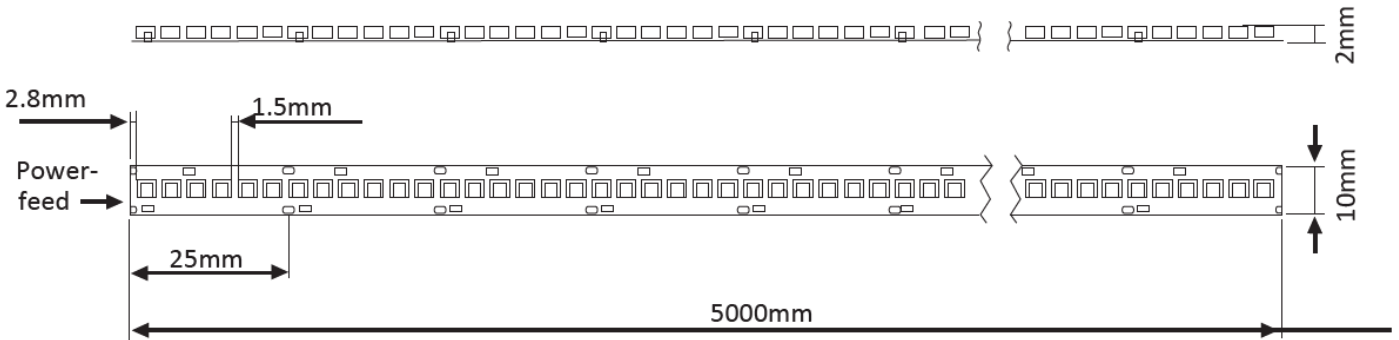

With 240 LED chips per meter, this product produces a (non dotted) linear effect.

All our strips come as standard with the highest grade self adhesive, 300MP. 19.2 watts LED strip MUST be mounted on an aluminium profile to guarantee product performance and warranty.

**Technical Specification**

<b>Max Wattage</b>	19.2 w/m	<b>Dimension</b>	5000mm x 10mm
<b>LED Chip</b>	SMD 3528	<b>Cut</b>	Every 25mm
<b>LEDs per meter</b>	240 LEDs	<b>Colour Rendering Index</b>	Ra > 90
<b>Construction</b>	PCB	<b>Beam Angle</b>	120°
<b>IP rating</b>	IP20	<b>Energy Efficiency Rating</b>	A+
<b>Fixture</b>	Self Adhesive (300MP)	<b>Estimated Life</b>	35.000 hours
<b>Voltage</b>	24V		

Product Code	IP Rating	Colour Temp	Lumens/m	Lumens/w
LEDS-19.2W-3K	IP20	3000K	1260 lm	65.63 lm/w
LEDS-19.2W-4K	IP20	4000K	1320 lm	68.75 lm/w
